Incident Management Situation Report Friday, May 10, 2024 – 0730 MDT National Preparedness Level 1

National Fire Activity (May 3, 2024 – May 9	, 2024):
Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (442 fires)
New large incidents:	5
Large fires contained:	2
Uncontained large fires:	5
CIMTs committed:	0
NIMOs committed:	0

Nationally, there is one fire being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

Understanding the IMSR

IMSR Map

This report will be posted every Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

Southwest Area (PL 2) Fire Activity and Teams Assigned	Totals
New fires:	72
New large incidents:	3
Uncontained large fires:	3

* **Wolf**, Coconino NF, USFS. Twenty-three miles north of Payson, AZ. Timber and grass. Moderate fire behavior with backing, flanking and isolated torching. Structures threatened. Area, road and trail closures in effect.

* **Horse**, Tonto NF, USFS. Twenty-eight miles southwest of Payson, AZ. Brush, grass and hardwood slash. Minimal fire behavior with running, smoldering and creeping.

* **Flying Bucket**, Central District, Arizona DOF. Fourteen miles southwest of Maricopa, AZ. Grass and brush. Minimal fire behavior with smoldering. Structures threatened.

Disclaimer: Changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Dry conditions will continue into Saturday across the Southwest west of the Divide, with locally breezy conditions along the Mogollon Rim. Meanwhile, scattered to widespread showers, with high elevation snow, will develop near and east of the Divide in Colorado and New Mexico into the adjacent High Plains. Dry and breezy conditions will likely spread across much of New Mexico Sunday into Monday, but conditions will likely be mitigated by earlier precipitation. Above normal temperatures are forecast across the Northwest into California, the northern Great Basin, and northern Rockies into early next week. Temperatures will cool closer to normal mid-next week, with scattered showers for the northern Rockies into the northern Plains.

Widespread showers and thunderstorms will develop from central Texas and Oklahoma through the Southeast this weekend through early next week, with heavy rain from central/east Texas into Georgia. Precipitation will fall across the Florida Panhandle but amounts for the central and southern Florida peninsula remain uncertain, with very dry and occasionally breezy conditions preceding the rain across the peninsula. Periods of light to moderate showers are also forecast across the Upper Midwest, Ohio Valley, and Northeast for the next week. Cool and showery conditions are forecast for much of Alaska into early next week. A wet pattern is forecast for Hawai'i through the weekend due to an upper level low, with gradual drying but still showery conditions for the islands early to mid-next week.

National Predictive Services Outlook

6 Minutes for Safety:

The 6 Minutes for Safety topic of the day is Ash Pit Hazards.
