

**Incident Management Situation Report
Friday, June 6, 2025 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Fire Activity and Teams Assigned	Totals
Initial attack activity:	Light (95 fires)
New large incidents:	0
Large fires contained:	1
Uncontained large fires:	7
CIMTs committed:	0
Type 1 IMTs committed:	0
NIMOs committed:	1

Nationally, there are zero fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

[Understanding the IMSR](#)

[IMSR Map](#)

One U.S. Forest Service contracted large airtanker, one incident management team, five fire suppression crews and 41 overhead personnel are assigned to large fire support in Canada.

This report will be posted Monday - Friday at 0730 Mountain Time unless significant activity occurs.

Active Incident Resource Summary

GACC	Incidents	Cumulative Acres	Crews	Engines	Helicopters	Total Personnel	Change in Personnel
AICC	0	0	0	0	0	0	0

TOTAL ACRES:		103,471	15,105	39,809	20,810	928,092	133,707	1,240,993

Ten Year Average	Quantity
Fires (2015 – 2024 as of today)	22,088
Acres (2015 – 2024 as of today)	1,212,759

Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.

Predictive Services Discussion:

Temperatures will warm to well above normal in the Pacific Northwest into the northern Rockies and northern Great Basin this weekend as relative humidity falls to 8-20% for the valleys and 15-30% for the mountains. Isolated mixed wet and dry thunderstorms will develop Saturday in northern California and spread into southern Oregon and western Nevada Sunday. Hot temperatures will return to the Sonoran Desert this weekend along with extended periods of low relative humidity. Locally elevated conditions are possible for southeast Arizona into southwest New Mexico today due to gusty westerly winds before winds diminish this weekend. Drier conditions will also return to the Greater Four Corners this weekend, but temperatures will not be as hot nor humidity as low. A cold front will move through the central and southern Plains, Ohio and Tennessee Valleys and Northeast through the weekend with scattered to widespread showers and thunderstorms. Another cold front will move through the northern Plains and Midwest this weekend, with breezy northwest winds behind the front across eastern Montana and the western Dakotas creating elevated to locally critical conditions. Locally breezy southwest winds are possible ahead of the front in the Upper Midwest, followed by scattered showers and thunderstorms late Sunday. Cooler than normal conditions with scattered to widespread showers will continue across southern Alaska and into the Interior, with a brief period of drier conditions across the eastern Interior Saturday.
