

**Incident Management Situation Report  
Wednesday, May 21, 2025 – 0730 MDT  
National Preparedness Level 2**

**National Fire Activity:**

| <b>Fire Activity and Teams Assigned</b> | <b>Totals</b>    |
|---|------------------|
| Initial attack activity:                | Light (63 fires) |
| New large incidents:                    | 1                |
| Large fires contained:                  | 1                |
| Uncontained large fires:                | 6                |
| CIMTs committed:                        | 2                |
| Type 1 IMTs committed:                  | 0                |
| NIMOs committed:                        | 0                |

Nationally, there are zero fires being managed under a strategy other than full suppression. Uncontained large fires include only fires being managed under a full suppression strategy.

|--|------------------|
| <b>Fires (2015 – 2024 as of today)</b> | <b>19,318</b>    |
| <b>Acres (2015 – 2024 as of today)</b> | <b>1,091,102</b> |

**Cumulative acres showing in the Active Incident Resource Summary Table may not be reflected in the YTD statistics due to a lag in units completing YTD adjustments in the SIT/209 Application. Otherwise, changes in agency YTD fires and acres reflect more accurate mapping or reporting adjustments.**

## **Predictive Services Discussion:**

Very dry conditions with minimum relative humidity of 3-12% will continue across the Mojave Desert into the southern Great Basin and Southwest, with poor overnight recovery of 10-30% for mid-slopes and ridges. Very dry conditions will also spread into the California Central Valleys, as well. Breezy and dry westerly winds of 15-20 mph will develop across the eastern Carolinas this afternoon amid relative humidity below 35% creating locally elevated conditions. Another day of low minimum relative humidity below 35% is expected across northern Minnesota, but winds will be lighter and generally near or less than 10 mph. Widespread wetting rain will fall from the Lower Great Lakes into the Mid-Atlantic today, with isolated to scattered showers and thunderstorms along a weakening cold front from southern Georgia along the Gulf Coast to South Texas. Isolated showers and thunderstorms are expected across the northern Plains this afternoon, with another round of light showers moving into the Cascades overnight. Generally mild and dry conditions will return to Interior Alaska today, with light showers along the southern coast and into southwest Alaska.
